Social justice issues are inextricably tied to environmental justice and must be part of the environmental agenda. Once elected, Lindblad will fight in favor of, and advance legislation to:

- **Save Our Neighborhoods - Our Quality of Life Living Wage, Renewable Energy, Green Jobs**

Relocalize water resources, finance, energy, material goods and food production. Fully fund our District-wide ground water cleanup projects. Lowered Impact Development - More parks. Halt foreclosures with lowered loan values.

- **Stop Corporate Personhood and politics of personal enrichment in favor of a Green New Deal**

Ban all corporatist lobbying and campaign spending with full implementation of public financing of elections - halts lobbyist influence over land-use planning.

- **Protect Human rights - not Privilege and Raids**

Human Dignity, building community and fair Immigration rights by immediately ending raids and deportation. Early childhood care, education, mentoring and sports to prevent gang violence. Reverse long term spending on prisons over education.

Jack Lindblad is running to a win of California's 39th State Assembly District seat in 2012, after tripling his share from 8.1% in 2008 to 22% in 2010, in back-to-back contests and a one-on-one rematch with the incumbent, a stellar showing for non-Corporatist, alternative parties. His award-winning sustainable urban design and architecture practice has a healthcare facility emphasis. Lindblad campaigns on a Green-values platform for a carbon-neutral, relocalized, 100% renewable energy, steady state economy, basing development on bio-regional determinism, not developers.

He will advance these moral imperatives in the Legislature to balance the budget, manage multiple collapses, create Green Jobs, mitigate and adapt to ecological collapse's worst catastrophes. A member of Economic Alliance of the San Fernando Valley Livable Communities Council, he has supported community grass-root efforts, forming neighborhood councils, co-authoring sustainable community plans, stopping gentrification, revitalizing the Tujunga-Pacoima Watershed, assisting in the 'No on B' win to provide unfettered solar power to stakeholders, serves as a local contact for the national Move to Amend - Abolish Corporate Personhood movement, founded our Community Gardens and Pacoima Canyon advocacy groups.

Two corporatist candidates cancel out each others viability with their daily onslaught of mailers - it cloaks the real evidence of both of their unfitness to run, let alone hold public office. What are they covering up? Six bureaucratic/developer enriching projects that put our communities at risk - from the granite strip mining, the destruction of groves of Eucalyptus for more hard surfacing in parks, in overburdening the community with sediment debris from the 2008 and 2009 fires, to Lake View Terrace and Sunland-Tujunga being destroyed by developers using SB 1818, Density Bonus to countermand another SB 375 that links land use to meeting our mandate to lower greenhouse gases.
